Opening School Facilities

Ripple Primary School in Barking & Dagenham is the latest school to have benefitted from Opening Schools Facilities Funding (OSF), using its grant to install three new games from Play Innovation across two of its sites in different playground zones.

OSF – which is provided by the Department for Education and distributed by London Sport – is designed to help schools deliver extra-curricular activities and out-of-school physical activities to pupils and the wider community.

Play Innovation is a global leader in interactive play equipment and inclusive sport with a mission to give people of all ages and abilities access to fun, innovative and inclusive games which improve physical, mental and social health.

Play Innovation coaches went into Ripple Primary school to carry out a workshop and to explain ways to play – and the children were enthusiastic about their new games.

Martin Rose, PE lead said: *"The children are absolutely loving the Play Innovation games, which are both getting them physically active & helping them with accuracy, numeracy, team play and turn taking."*

Play Innovation's target games can be attached to practically any existing fence or wall and only require a small area of 5m x 4m. To maximise your school PE budget and OSF funding, contact Play Innovation – or download a brochure & price list from the London Sport website
